

ALYOS®

Personalise your interior with a picture, artwork or photo mural or ceiling

The ALYOS® system offers exceptional acoustic values whilst allowing you to choose your design from our wide range of images and personalise your room to suit the atmosphere and decor you desire.

ALYOS® design may be applied to walls and ceilings all shapes and any size (up to 5m wide and 50m long without a seam).

ALYOS® design allows you to easily create a large-scale picture, artwork or photo mural for your wall or ceiling.

Our consultants and graphic designers will provide you with support to make 'tailor-made' projects.

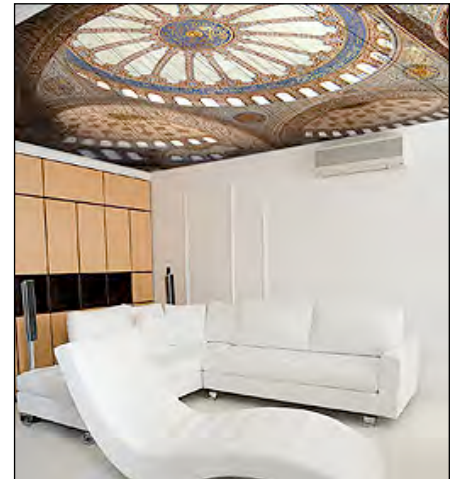

ALYOS® design system is ideal to conceal damaged, cracked or stained ceilings and walls, hide beams, visible cables and piping or just to give your decor a new lift.

Benefits:

- Acoustic with maximum effect and Architectural design
- Possibility of creating curved, arched, horizontal, pitched and vertical surfaces
- Hides unsightly imperfections of cracks, stains, pipes, cables or flaking paintwork
- Economical installation, finish and decoration in one go
- Use in kitchens, bathrooms & indoor swimming pools unaffected by bumps or humidity
- Complies with BCA requirements
- Fast and effectively hide unsightly ceilings or walls without mess
- Replacement of decor possible on same frame
- Easily installed by professionals, no need to remove furniture
- It's odourless

Applications:

- New buildings or refurbishment
- Residential or Corporate
- Hotels/Motels
- Entertainment & Conference Centres
- Restaurants
- Shopping Centres
- Schools & Tertiary
- Indoor Swimming pools & Bathrooms

This system can be used with any decorative fitting, light fittings, air conditioning grills, down lights, etc.

With ALYOS® clean design system you no longer need plaster-boards, coatings or painting even in damp or chlorinated environments.

The type of materials and the quality of the coating allow optimal tension to be achieved, without joints, seams (up to 5m wide and 50m long) or suspension brackets.

The ALYOS® system consists of a polyester fabric coated with Polyurethane (PU) which is then inserted into the PVC profile (no thicker than 10mm) enabling a perfect fit on any architectural shape.

The fabric is fitted into the profile using a curved spatula. Its ribbed lip system prevents the covering from slackening.

A precision knife is used for the finishing touches. Only a 5mm finish strip remains visible. Installation is only done by our experienced installers.

Have your own high resolution photograph or a favourite artwork* transformed on your walls or ceilings.

Alternatively choose from the ALYOS® wide range of Royalty free images on: www.alyos.eu/en/collections_en/ or www.shutterstock.com/

* Commission your own original artwork or Royalty free paintings www.paulbattams.com.au

Our consultants will be happy to quote over the phone or visit the premises for a more accurate recommendation.
